

News Release:

Septech expands regional presence in Muscat, Oman

Muscat, Oman, October 07, 2009 – Septech, the region's leading innovative water infrastructure solutions provider, has extended their presence across the Middle East through the creation of a regional office in Muscat, Oman.

As part of an ongoing overall GCC expansion strategy for Septech Holdings, Septech Muscat LCC has extended its expertise into Oman. The office, which includes a group of 10 engineers and water specialists, is dedicated to building long term relationships to identify future opportunities as well as managing all Septech projects in Oman.

While Oman shows great potential for water, wastewater and marine manufacturing, Septech plans on supporting the Omani Government to deliver key future infrastructure projects in years to come. To date, Septech has been heavily involved with Aldar, Tatweer, Atlantis, Jumeirah, Emirates, Dubai Holdings, Al Futtaim, Arabtec, Etisalat, TDIC, GCC Authorities, Authority for Water and Electricity in Oman along with most of the recently built marinas in Oman.

“Septech is very excited about the establishment of our Oman regional office. The current opportunities in Oman in relation to specialised infrastructure have been a key strategic driver for growth of the Omani Government and developers across the Sultanate, and we look forward to working closely with these entities to ensure that a world-class water and wastewater infrastructure is built for the population of Oman,” David Heffernan, Chief Executive Officer, said.

Septech has been offering the most innovative water infrastructure solutions throughout the Middle East region since 1997. From the design stage to completion, ongoing operations and management of a project, Septech can custom design, manufacture and install solutions to meet any project requirements. Septech invests heavily in extensive international market research and development in order to stay abreast of industry developments and to proactively identify opportunities for both clients and stake holders.

Heffernan added, “We are looking at three market verticals in and across Oman which will include our offerings in desalination, sewage treatment solutions and emergency mobile water applications including an emphasis on the management of these “liquid assets” for long-term management programmes.”

About Septech

Established in 1997, Septech is a privately owned company that provides innovative water infrastructure and specialized industry solutions to governments, municipalities, public and private developers across the Middle East. Septech's extensive portfolio spans six major business units, including water, waste water, mobile water, precast infrastructure, marine and utilities management. Septech has distinguished itself within the industry as an independent entity capable of providing tailor-made water solutions and has been involved with a number of landmark projects in the UAE, including the Atlantis hotel, Festival Marina – Dubai Festival City, the Royal Yas Marina – Yas Island, The Els Club – Victory Heights and Tiger Woods, thereby earning the company a reputation as a specialist industry leader.
