

News Release:

Septech Showcases Advanced Marine Solutions at 2008 Emirates International Boat Show Abu Dhabi

UAE based Septech, the region's leading innovative water infrastructure and specialised engineering solutions provider, respected as the 'company of choice' for the design, manufacture and construction of residential, commercial and luxury super yacht marine facilities has announced its participation and the showcasing of the company's marine portfolio at the first Emirates International Boat Show, Tuesday 25th – Saturday 29th November, at the Abu Dhabi International Marine Sports Club (ADMISC).

More than 150 exhibitors are participating in this event which will showcase 200 boats on land and in water.

Septech, in partnership with the world's largest marina manufacturers Bellingham Marine, is recognised throughout the Middle Eastern region for its 50+ years of cumulative industry experience and the construction of some of the most celebrated marine facilities including: Festival Marina – Dubai Festival City; Dubai Yacht Club Marina and now stage two and three of the development Marina Mall and West Marina; Royal Yas Marina – Yas Island and The World. During the inaugural Emirates International Boat Show, Septech is set to unveil their exclusively manufactured portfolio of marine products including Unifloat® concrete floating marine systems and wave attenuators, Unidock® residential marina systems, Unistack® dry-store facilities and its Marine Management Solutions software.

"In spite of the current global economic down turn impacting commercial sectors, 2008 has been an amazing year of growth for our marine business and we remain confident in the region's ability to remain competitive in the new year. Emirates International Boat Show is an opportunity to stop, reflect and celebrate this success with our clients and business partners," said Mr. Bruce Birtwistle, Business Unit Manager for Septech's Marine Business Unit. Septech will be located on stand SS-5 during the Emirates International Boat Show Festival at ADMISC. The International Boat show is open from 4pm – 10pm daily.

About Septech

Established in 1997, Septech is a privately owned company that provides innovative water infrastructure and specialized industry solutions to governments, municipalities, public and private developers across the Middle East. Septech's extensive portfolio spans six major business units, including water, waste water, mobile water, precast infrastructure, marine and utilities management. Septech has distinguished itself within the industry as an independent entity capable of providing tailor-made water solutions and has been involved with a number of landmark projects in the UAE, including the Atlantis hotel, Festival Marina – Dubai Festival City, the Royal Yas Marina – Yas Island, The Els Club – Victory Heights and Tiger Woods, thereby earning the company a reputation as a specialist industry leader.
